

SYMPOSIUM

How wound leakage impacts on the quality of life for patients with lower extremity wounds

Date:
May 1st,
13:00–14:00 GMT

Room:
Platinum 1–2,
Level 3

Synopsis:

This symposium, hosted by Mölnlycke Health Care, will examine the effects of insufficient management of high exudation. If not properly managed this can delay wound healing, lead to leakage, soiling of clothes and bedlinen, malodour, pain and the need for frequent dressing changes. All these things can have a detrimental effect on the quality of life for patients, causing embarrassment, distress and self-isolation.

Join us to learn more about how to address these problems.

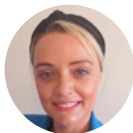

Speakers:

Dot Weir
RN, CWON, CWS

- Certified Wound and Ostomy Nurse and Certified Wound Specialist
- Co-Chair of the Symposium on Advanced Wound Care
